

The Few

Application UI Description

Content provider: **7 Few, LLC**

Application ID: **com.sevenmotion.thefew**

Application version: **1.0.1**

Document date: **2026-08-20**

Category: Videos — Live TV & video-on-demand player for IPTV subscriptions the user already owns.

1. Revision history

Version	Date	Changes	Author
1.0	2026-08-14	Initial submission.	7 Few, LLC
1.1	2026-08-20	Added app preview images and the remote-control key policy, per Samsung Doc Review feedback.	7 Few, LLC

2. UI structure

The application is a “10-foot” TV interface, fully navigable with the standard Samsung remote control. Screen flow:

Launch → **Activation** (first run only: the TV shows its device code / MAC address; the service operator activates it server-side, no on-TV typing required) → **Home** (content rails) → from Home the user reaches: **Live TV player** (full-screen), **Channel list** (with live preview panel), **Movies** (video-on-demand), and **Settings** (language, themes, sources, diagnostics).

The Back key always returns to the previous screen; from Home it shows an exit confirmation dialog.

3. Main use cases

UC-1 — First-run activation. The user installs and opens the app. The activation screen displays the device identifier. The service operator (content provider) activates the device on the backend; the app detects the activation automatically and continues to Home. Reviewers: see the test account details provided in Verification Info — the review device is pre-activated with a demo source.

UC-2 — Watching live TV. From Home or the channel list, pressing OK on a channel opens the full-screen player. Channel Up/Down (or Arrow Up/Down) zaps to the next/previous channel. Typing a channel number with the digit keys jumps directly to that channel. Pressing OK shows the channel overlay (name, program, progress).

UC-3 — Watching a movie (VOD). From the Movies screen, OK starts playback. Left/Right seek, OK pauses/resumes via the overlay. Playback position is remembered and offered as “Resume” on the next opening.

UC-4 — Changing the app language. Settings → Language: the interface is available in 9 options (system default, English, French, Spanish, Arabic, Norwegian, Swedish, Danish, Swahili) and switches instantly.

4. Menus and functions — app preview images

[APP PREVIEW IMAGE TO INSERT — 01-activation]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 1 — Activation: the TV shows its device code; activation happens server-side (no typing on TV).

[APP PREVIEW IMAGE TO INSERT — 02-home]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 2 — Home: content rails (live channels, favorites, movies, quick access), D-pad navigation.

[APP PREVIEW IMAGE TO INSERT — 03-channels]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 3 — Channel list with categories and live preview panel; OK opens full-screen playback.

[APP PREVIEW IMAGE TO INSERT — 04-player]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 4 — Full-screen live player with channel overlay (OK); Channel Up/Down zaps; digits jump to a channel number.

[APP PREVIEW IMAGE TO INSERT — 05-movies]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 5 — Movies (VOD) shelf with posters; OK plays; resume is offered on reopening.

[APP PREVIEW IMAGE TO INSERT — 06-settings]

Drop the screenshot in docs/store/samsung/screenshots/ and re-run the script.

Screen 6 — Settings: language (9 options), themes, sources, diagnostics.

5. Remote control key policy

Keys handled on **all screens** (navigation):

Remote control key	Action
Arrow Up / Down / Left / Right	Move focus between items.
OK (Enter)	Activate the focused item.
Back (Return)	Go back to the previous screen. On Home: show the exit confirmation dialog. On Exit:

Keys handled in the **full-screen player**:

Remote control key	Action
Channel Up / Arrow Up	Zap to the previous channel in the list (live TV).
Channel Down / Arrow Down	Zap to the next channel (live TV).
Digits 0–9	Type a channel number to jump directly to that channel (live TV).
OK (Enter)	Show/hide the channel overlay (name, current program, progress bar, actions).
Arrow Left / Right	Seek backward / forward (movies and catch-up); with the overlay open: move between
Play / Pause	Pause and resume playback (movies; live pause releases the stream and resumes at
Back (Return)	Leave the player and return to the previous screen (the stream connection is closed im

No other special keys (color keys, voice, pointer) are required: every function is reachable with the D-pad, OK, Back, the digit keys and Channel Up/Down.

6. Language options

The service country is the United States and the default interface language is **English**. The interface is fully localized in 8 languages (English, French, Spanish, Arabic, Norwegian, Swedish, Danish, Swahili). By default the app follows the TV system language when supported; the user can override it at any time in Settings → Language, and the change applies instantly without restarting.

7. Test account / review notes

The application requires a service activation (per device). The test account and pre-activated review details are provided in the Verification Info section of the Seller Office submission. No payment happens inside the application.
